

Artur Chrapowicz

Web Developer & UX/UI Designer

[PDF Portfolio](#)

Coding and creating websites since 2018

A website is more than just a digital presence—it's a bridge that connects businesses with their audience, a tool to build trust, and a platform to sell ideas, products, or services. As a web developer and UX/UI designer, I approach every project with the goal of creating seamless, user-centered experiences that help businesses communicate their value and achieve their goals. For me, great design is about empowering connections and driving meaningful results.

Skill Set

Extensive experience in web development and front-end technologies: HTML, CSS (SCSS, SASS), JavaScript, WordPress, Vue.js, TypeScript, React, PHP, MySQL, speed and scalability optimization, Google webmaster practices. Proficient understanding of asynchronous request handling, partial page updates, features of modern browsers, cross-browser compatibility issues and solutions, code versioning tools.

Knowledge and understanding of practical UX/UI implementations: Figma, Adobe XD, user-centric design, Heuristics Evaluation, Jakob's Niesen's usability principles, user testing, UX research, accessibility and usability.

Personal interests in international businesses models and fitness.

Awards

Work In Progress Santander Start Up Award 2022

Competitions

Website design and implementation, SEO campaign

NKD Aesthetics

Website implementation, SEO campaign

PL47ES

Website design and development

Lid Assist

Website design and development

Agencja 3A

Website design and development

Testimonials

Carmel Kammeier

User Experience Researcher Expert

Artur is a very talented individual with a broad skill set across UX design and research, and web and mobile app development. I have followed Artur's work on the 'Charge My Street' project. Artur undertook a very good Heuristic Evaluation and task-based, User Testing of the current website. His analysis of the research outcomes and prioritisation of the areas for redesign was very systematic. I have seen the new website design in progress and the transformation is very impressive. I am sure that the team at Charge My Street will be delighted with Artur's work, and I have no difficulty recommending Artur to others who need a user-centric approach to UX design and development.

Elisavet Christou

EViD Tool founder

Excellent service! We hired Artur for the design of our website EViD Tool and we have been very happy with both the delivery of service and the end result. We had initial meetings to discuss ideas and finalise a brief and follow-up meetings to ensure the website design the its functionalities were what we wanted. We also received guidance and support in how to maintain and manage our website.

Artur Zablotny

Bachaturo organizer

Working with Artur on our website was a great decision. The new website has attracted more visitors and has received positive comments from our participants! We highly recommend their services.

Rafel Florit

Entree Automotive director

I have worked with Artur to build our e-commerce platform and it is fair to say that he is the most talented individual I have worked with so far. I have previously worked with other companies to build the websites for my other businesses, however, you often find that web developers are either creative but not very technical or technical but not very creative. However, Artur has a nice combination of both technical knowledge and creativity which results in the end product standing out from other websites. It has been a pleasure to work with him and we'll definitely use his services again.

Daniel Heery

Cybermoon and Charge My Street director

Artur did a fantastic job organising user testing with a cohort of volunteers and then delivered a plan to improve the design of the website. He successfully worked with our website designer to implement the design and liaised with other professionals like a copywriter.

Case Studies

Comidacanina: Sustainable Pet Food Store

I worked with Comidacanina, a Majorca-based company, to design and develop an online store for their sustainable, luxury pet food brand. One of the unique features I implemented was a product quiz to gather user information about their pets and recommend tailored products.

The pet food industry in Spain is highly competitive, so I focused on creating a design that would stand out while delivering an excellent user experience.

- Designed a unique website to enhance brand identity and user engagement.
- Developed a WooCommerce-based store with hundreds of products for easy management.
- Coded a custom product quiz for personalized recommendations.
- Optimized the site for multiple languages to serve a diverse customer base.
- Improved performance with speed optimization and thorough testing.

The collaboration resulted in a professional, user-friendly website that boosted brand visibility with a distinct color palette and engaging visual elements. The site has become a key tool for attracting clients, representing the brand's professionalism, and solidifying Comidacanina's position as a leading pet food provider in Spain.

Parabellum Performance: Premium Automotive Parts Store

I partnered with Parabellum Performance, a UK-based provider of high-end car tuning parts, to design and develop their online store. The goal was to create a user-friendly, professional e-commerce platform that emphasized intuitive navigation and premium branding.

The project required a minimalist design that highlights products, a custom navigation system for car brands and models, and an optimized mobile experience.

- Designed a premium, aesthetic UI to enhance brand perception.
- Developed a bespoke navigation bar for easy product searches by car make and model.
- Improved mobile responsiveness to ensure seamless shopping across devices.
- Conducted competitive research to integrate SEO-friendly practices.
- Built and tested the site using WordPress and WooCommerce for reliability and performance.

The final website is a sleek, functional e-commerce platform that reflects Parabellum Performance's premium image. With responsive design, streamlined navigation, and performance optimization, the site has become a powerful sales tool that effectively connects the brand with car enthusiasts nationwide.

Black Pack: Revamping a Car Wrapping Business Online

I worked with Black Pack, a Manchester-based car wrapping company, to modernize their outdated website and enhance their online presence. The previous site suffered from poor performance, slow loading times, and an unappealing design, which hindered user experience and lead generation.

The UK car wrapping industry is highly competitive, so my focus was on creating a standout design, improving performance, and implementing a robust SEO strategy.

- Designed a user-centered, custom website to showcase services and client work.
- Implemented on-page and technical SEO, including keyword optimization for local search terms like “Car Wrapping Manchester.”
- Launched a link-building campaign to boost visibility and domain authority.
- Enhanced performance with speed optimization and ongoing technical support.

The redesigned website positioned Black Pack as a leading car wrapping provider in Manchester, increasing traffic from 504 to 19,500 monthly views within a year—a 39x increase. The site now ranks on the first page of Google for over 1,600 keywords, driving engagement and significantly improving lead generation.

World Bachata Meet Up: Designing for a Global Event

I collaborated with World Bachata Meet Up, a renowned bachata event based in Warsaw, to create a modern, engaging website that reflects the event's size and popularity. After speaking with Karolina, the event organizer, I committed to delivering a visually striking and highly functional design to build excitement among users.

The website needed to convey the scale and prestige of the event while being responsive, intuitive, and performance-optimized to ensure an exceptional user experience.

- Designed a custom UI/UX tailored to the event's unique vibe, with a clean layout and smooth navigation.
- Developed the website using WordPress, optimizing for performance, speed, and mobile devices.
- Integrated a newsletter system for direct communication with attendees.
- Provided ongoing support, including custom admin tutorials for easy content updates.

The new website delivered an exceptional user experience, enhancing engagement and satisfaction. Optimization efforts reduced loading times significantly, creating a seamless browsing experience. Additionally, the visually captivating design reinforced the event's brand image, establishing it as a leading global bachata gathering.

This collaboration resulted in a high-performing website that increased organic traffic, improved conversion rates, and strengthened the World Bachata Meet Up's digital presence.

Charge My Street: Revamping the Website for a Greener Future

I worked with Charge My Street, an organization focused on making electric vehicle (EV) charging accessible across England, to improve their website. Their mission to promote sustainability and community-funded EV charge points resonated with me, and I was eager to support their goals with a website redesign that enhanced user experience and engagement.

Charge My Street's existing website presented several usability issues that impacted the user experience, including complex navigation, unclear information structure, inconsistent design, and hidden map features crucial for locating charging points.

- **Heuristic Evaluation:** Conducted a thorough evaluation to identify usability issues and areas for improvement.
- **User Testing:** Engaged 12 volunteers to test the website across mobile and desktop devices, gaining insights into navigation and task completion issues.
- **Redesign:** Developed a new user interface with simplified navigation, improved content structure, and consistent design. Enhanced the visibility of the map feature and clarified the charging process.

The redesigned website received highly positive feedback, with users appreciating the streamlined navigation and clearer information structure. The improvements led to faster task completion, enhanced accessibility, and greater user satisfaction. The updated design also aligned better with Charge My Street's mission, reinforcing their commitment to sustainability and innovation, and improving the overall brand perception.

EViD Tool: Enhancing User Experience and Functionality

EViD is a research tool developed by Lancaster University and Curtin University, to create a website that effectively describes and promotes the tool. Collaborating with Elisavet, Pinar, and Philip, the goal was to design a visually appealing and functional platform while ensuring it was easy for the client to manage through WordPress.

The website needed to present the tool's features clearly while being intuitive, visually engaging, and optimized for both desktop and mobile users.

- Designed a clean, minimalistic UI/UX that aligned with the tool's purpose, offering a modern look and easy navigation.
- Developed the site in WordPress, ensuring that the client could easily manage content, including adding new projects and maintaining a blog.
- Integrated a newsletter system to enable ongoing communication with the website's audience.
- Optimized the website for speed and mobile devices, ensuring a seamless browsing experience across all platforms.

The redesigned EViD Tool website significantly improved user experience, offering a smooth and intuitive interface. On-page SEO optimizations boosted search engine visibility, and functional upgrades facilitated easier management of content and communication. The collaboration resulted in a visually appealing, high-performing website that effectively showcases EViD's capabilities, enhancing its reach and usability.

Bachaturo: Reimagining the Online Presence of a Global Dance Festival

I worked closely with Artur, the organizer of Bachaturo, the world's largest Latin dance festival, to redesign its website. The original site wasn't reflecting the scale or significance of the event, so Artur reached out for help in creating a platform that could convey the festival's professional yet playful vibe.

- I redesigned the website with a bespoke, user-centered UI, keeping the festival's global reach and vibrant energy in mind.
- Integrated the in-house ticket system smoothly into the site for a seamless user experience.
- Optimized the site for mobile devices, ensuring it was fast and responsive.
- Translated the website into multiple languages to cater to a diverse, global audience.

The new website delivered a professional, visually engaging experience for visitors, with a focus on UX and smooth functionality. The site's mobile optimization and integrated ticketing system created a seamless user experience. Additionally, its SEO foundation helped it rank high on search engines, driving significant traffic and attracting Latin dance enthusiasts from around the world to the festival.

Aesthetics By Elise: Boosting Online Presence for a Local Beauty Clinic

Elise from Aesthetics By Elise, a beauty clinic in Bolton, UK, approached me to help increase her online presence. The goal was to create a website that reflected the clinic's services and appeal to local customers, while also improving visibility through SEO.

- I created a new, responsive HTML website design that highlighted Elise's services while providing a professional yet welcoming look.
- Mobile optimization was a key priority, ensuring that the site was fast and easy to navigate on iPhones.
- The SEO campaign focused on targeting local keywords relevant to the beauty clinic industry in Bolton. This included keyword research, creating sub-pages for valuable keywords, and enhancing Google My Business and local directories.
- A comprehensive local SEO strategy was applied, including both on-page and technical SEO improvements.

The new website provided a seamless user experience with fast loading times, scoring 99 on PageSpeed Insights. The local SEO campaign resulted in a significant increase in visibility: within the first 5 months, monthly views grew from 79 to 2,840, and the number of keywords the website ranked for expanded from 14 to 122. This increased online presence has helped Aesthetics By Elise attract more local customers and solidify its place in Bolton's beauty industry.

PL47ES: E-Commerce Store Design and Development for a Leading UK License Plate Supplier

PL47ES, a leading UK supplier of custom license plates, approached me to design and develop an e-commerce website that would allow customers to easily visualize their custom plates. The goal was to create a functional, user-friendly online store that provided a seamless experience for browsing and purchasing custom license plates.

- I designed a custom "industrial" style UI, ensuring the website reflected the brand's unique offering while providing clear, easy-to-read product information.
- The website was developed on Shopify, where I worked from a basic template and customized it to reflect the client's specific needs. A custom-coded plate selector was integrated to allow users to see both the selected plate design and the model.
- Ongoing support was provided throughout the project, including regular meetings to ensure the client was fully informed and comfortable managing the site.

The new e-commerce website has seen significant growth in daily traffic, with PL47ES enjoying increased sales. The custom product selector and clear design have enhanced user experience, leading to a smooth and engaging shopping experience. This collaboration has played a key role in PL47ES's ongoing success and growth in the competitive license plate market.

Additional Projects

Recommendation

Jeje Hamze

IRVETTA co-founder and director

Artur Chrapowicz joined IRVETTA as a Website Developer for 4 months. He worked closely with the creative team and director to produce various website assets focusing on upgrading the IRVETTA website to its maximum potential for this year's new collection. With regular remote communication with the team, he developed and deployed content within tight time frames and most impressively worked through any obstacles very promptly. He was quick to acquire a new platform (Shopify) and enhance the website by researching different strategies and proposing programmable code that are compatible with future technologies and also for easy reuse. He is passionate and took initiative working independently and motivated when getting involved with the creativity in team meetings. He never ceases to amaze me when resolving problems with simple and effortless solutions and always takes care to showcase all initiated periodic testing and contingency plans when dealing with more complicated front to back end development. All projects were implemented swiftly whilst the website was live and not once did we experience any crashes. Artur would be a great asset for your company and has my highest recommendation. If you have any further questions with regard to his experience or internship at IRVETTA, please do not hesitate to contact me.
